WHY HAVE AN IMS?

- An Integrated Management System can be advantageous for a business by combining core fundamental processes, consequently increasing efficiencies and effectiveness.
- This can then lead to cost reductions through optimizing resources and minimizing disruptions.
- Integration can also deliver a holistic commitment to increase overall HSQ performance, employee and customer satisfaction and continuous improvement.

THE PLAN, DO, CHECK, ACT APPROACH

Based up the Plan, Do, Check, Act approach, the integrated HSQ management system structure is outlined below:

4 CONTEXT OF THE ORGANIZATION

As with all of the individual ISO Standards we need to determine the external and internal issues that are relevant and affect our ability to achieve the intended outcomes of our Integrated Management System.

This may include further defining and managing the HSQ risks and opportunities of the below (internal and external) aspects:

Internal (SWOT)

- Roles and accountabilities
- Workers
- Working conditions
- Market share
- Physical resources
- Performance
- Values and culture
- Innovation and knowledge
- Wastes and energy use

External (PESTLE)

- Customers
- Markets and competition
- Regulatory and statutory
- Technological
- Cultural and social
- General public
- Suppliers
- Political influence
- Contractors
